

# Software Developers

**We have vacancies for custom business software and mobile apps developers**

Join the successful Cemoc team who are creating and supporting software and mobile applications that are helping our customers to win millions of pounds of new business.

Ideal Skills:

- Developing and maintaining high quality data driven websites and Windows forms applications using Microsoft technologies.
- Creating and maintaining mobile apps using the Android and Xamarin platforms.
- Ability to design and build backend database solutions for new applications.
- Knowledge of Microsoft SQL Server to update data as required.
- Ability to interact with customers to specify the requirements for new projects and enhancements to existing projects. A full driving licence is required.
- Knowledge of cloud platforms, particularly Azure.

Based at our Wootton Bridge offices, we offer a competitive salary and package, dependent upon experience and achievement. We look forward to meeting you.
